Grupo Mexico's Toquepala copper mine in Peru

Hexagon president and CEO Ola Rollén said at HxGN LIVE Grupo México was among 10 companies chosen for "pushing the boundaries of innovation, and implementing Hexagon technology for bold, forward-thinking use to shape smart change around the world". The base and precious metals producer was nominated for its integration of Hexagon Mining technologies at the Toquepala copper mine in Peru.

Grupo México senior technical advisor Enrique Sanchez said the company was committed to improving efficiency across its mining processes.

"Hexagon's integrated mining solutions allow us to greatly improve our efficiency by shortening the gap between planning and execution," he said.
